

Alix Digital Flow Controller Instructions

The Alix controller was replaced by the new K500 controller in November, 2018.

Your Alix controller may continue to be used with your *whale orca*, *tsunami*, or *shurflo sentry* pump.

If you need to upgrade your pump, the new *GRI* pump that we are now using is not compatible with the Alix. We will include a K500 replacement with your purchase of a GRI pump.

The Alix controller:

- Meters and displays current flow rate in milliliters/second
- Shows accumulated run time and flow in liters
- Automatically runs hydrographs
