

EmFlume 1.5

Digital Depth Gauge

Description

The EmFlume1.5 Digital Depth Gauge is an upgrade to the standard analog Vernier depth gauge included with the system. The point gauge is easily adjusted and provides rapid, precise measurements to 0.01mm accuracy. The zero reference point is reset with the press of a button, making it easy to change the reference point; e.g. from bottom of the channel to the top of a weir for discharge calculations.

Specifications

Dimensions

6.35cm (2.5") wide
36.83cm (14.5") height
21.84cm (8.6") deep

Resolution

0.01mm (0.001in)

Measurement Range

0-211.34mm (0-8.321in)

Power

SR44SW button batter (included)
